<b>Office Action Summary</b>	<b>Application No.</b> 10/590,684	<b>Applicant(s)</b> SHEN ET AL.	
	<b>Examiner</b> Gary Hartmann	<b>Art Unit</b> 3671	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Inventions II and III have been examined.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10, 13, 14, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Hone et al. (U.S. Patent 6,330,726).

Hone discloses a boarding bridge including a tunnel (24, for example), elevator system (Figures 3, 7 and 8, for example), wheel mechanism (294) having a beam (292) and wheels (332, 334), and an auxiliary support system outside of the wheels having a driven leg support (300, 302, 306, 308) with a foot portion (336, 338) arranged as claimed.

Because the foot portion is configured to rotate, the connection meets the recitation of a hinge.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3671

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11, 12, 15 and 18-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hone et al., as applied above.

Hone teaches a foot on the auxiliary support system, but not a wheel. The examiner takes official notice that it is well known to a wheel on an auxiliary support system. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used a wheel with Hone in order to best suit a particular application.

Hone does not teach the angle detection system as claimed; however, angles are discussed extensively in the specification. In view of these discussions, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used a angle detection system in the manner claimed in order to efficiently operate the device of Hone.

### ***Conclusion***
